1. PLACE

Where is it?
What is it like?
How might it change?

Develop your Geographical Imagination!!!
Where places and landscapes are located and why they are there.

How physical and human features influence each other and how they are changing.

What social, economic, environmental and physical processes lead to patterns over space.
Appreciate different scales

Personal - local-national-international-global

Links between these scales
4. INTERDEPENDENCE

How are places connected?

How can the actions of a person in one place affect the life of someone living somewhere else?
5. Physical and Human Processes

How physical and human processes cause change in places

Explain patterns and distributions

Sequence of events and activities lead to changes in places, landscapes and societies.
People and the environment combine to cause change

There is a relationship between people and the environment

Wealth and social fairness around the world

Sustainable development

Conserving resources and preventing environmental damage.
People from different parts of the world have similarities and differences

Different people have different attitudes.

Who am I?

Where do I come from?

Who are my family?

Who are the people around me?

Where do they come from?

What is our story?

= Diversity and cultural cohesion!
